AI-Search Visibility: Where You Stand, What to Change

Out of the Woods Construction & Cabinetry, Waltham MA · Two-page brief

Prepared for Dave
November 5, 2026
Baseline measured October 28, 2026

When a homeowner asks ChatGPT, Perplexity, or Google AI Mode who should remodel their kitchen in Newton or build an addition in Needham, Out of the Woods is not in the answer. It appears only when someone already searches its name. Nothing technical is in the way: the firms that do get named have a current review base, a correct Houzz and Google listing, and a page for each town they serve. Page 2 lists the fixes and what they should do to these numbers.

0 of 48
service-and-town answers that named Out of the Woods, across three AI engines and 12 towns

3 of 3
brand-name searches that found the firm and described it accurately

9–16 of 48
projected after the 90-day plan on page 2, which is where Morse Constructions and JM Construction sit today

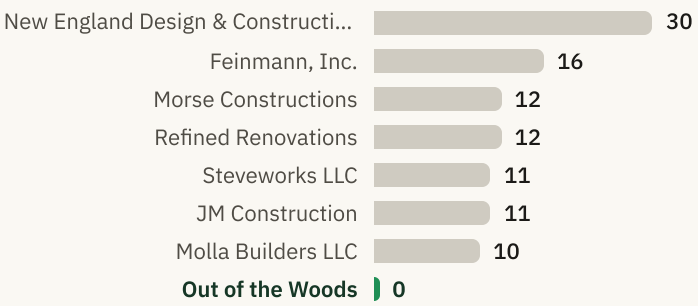

Current visibility by key area

AREA	AI ANSWERS	NAMED OOTW	WHO THE ENGINES NAME INSTEAD (TIMES NAMED)
Waltham (home town)	4	0	New England Design & Construction (4), BB&R Design-Build (3), Feinmann (3)
Newton, Wellesley, Needham, Lexington	23	0	New England Design & Construction (13), Refined Renovations (9), Steveworks (9)
Reading, Arlington, Belmont, Concord, Weston	11	0	Molla Builders (8), New England Design & Construction (7), ReModern Builders (4)
Boston and MetroWest	10	0	Feinmann (7), New England Design & Construction (6), McGuire + Co. Kitchen & Bath (4)
Brand-name searches ("Out of the Woods Construction reviews")	3	3	Named first every time, but engines call the review footprint "small and mixed" and surface the 2014 one-star Yelp review.

By service (answers naming OOTW): kitchens 0 of 14, baths 0 of 9, additions 0 of 9, design-build 0 of 15, cabinetry 0 of 1, even though "Cabinetry" is in the company name. **By engine**: Google AI Mode 1 of 8, Perplexity 0 of 3, simulated engine 2 of 40; every hit was a brand query. ChatGPT needs a signed-in account and should be spot-checked.

Firms the engines named most

Times named across the 48 service-and-town answers.

Why the engines skip Out of the Woods

1. **Engines shortlist from three sources.** Of the 48 answers, 32 drew on a Houzz town list, 41 cited a firm's own town or service page, and all 7 Google AI Mode answers were built from Google Business Profile cards with star ratings and review counts.
2. **Out of the Woods is absent from all three.** Its Houzz profile is filed under Acton with 3 reviews, the newest from 2017, so it is not on the Houzz Waltham list. Google shows 2 to 3 reviews. The website has no town pages and names only Waltham, Boston, and Arlington. Google AI Mode's Waltham answer listed six firms with 4 to 40 reviews; OOTW was not one.
3. **Listings disagree with each other.** Four addresses are live: 260 Bear Hill Rd (website), 1347 Main St (BBB, Google-synced Birdeye), Nagog Hill Rd, Acton (BuildZoom, MasterBrand), and Ryder St, Arlington (unclaimed Nextdoor duplicate). Engines read that as different businesses. Crawling is fine: robots.txt allows every AI crawler and all 17 pages fetched cleanly.

What to change, in priority order

1. **Fix Houzz and Google Business Profile** HOURS · OFFICE

   Houzz: location from Acton to Waltham, service area set to all twelve towns, services and photos refreshed. Google: address, phone, categories, and hours verified; services and towns in the description. These two listings feed every Google AI Mode answer and 32 of 48 answers here.

2. **Reach 25 Google and 25 Houzz reviews in 90 days** ONGOING · DAVE

   Start with the nine clients on the testimonials page, then every client from the last three years. Ask for the town and project in the review ("our Newton kitchen"). Reply to the 2014 Yelp review so a 3.0 from two reviews stops being the headline. Molla Builders ranks region-wide on 60 Houzz reviews and a four-page website.

3. **Make every listing say the same address** HOURS · OFFICE

   260 Bear Hill Rd, Suite 201, Waltham on BBB, BuildZoom (fix the phone too), MasterBrand, Alignable, MapQuest, Cylex. Claim and merge the Arlington Nextdoor page. Create the missing Angi profile; complete the PRO New England and NARI member pages, which engines cited for competitors.

4. **Publish one page per town, five first** WEEKS · WEB

   Newton, Wellesley, Needham, Lexington, Waltham; then Reading, Arlington, Belmont, Weston, Concord, and MetroWest. Each: 400 to 600 words, two or three real projects from that town with photos, the local housing stock, links to each service page. The top eight competitors average more than fifteen town pages. Fifty words with the town name swapped will not be cited.

5. **Retitle service pages; add a quotable "about" paragraph and an FAQ** DAYS · WEB

   Today: "Kitchen Remodeling Portfolio | Massachusetts". Retitle kitchens, baths, additions, and cabinetry as "Design-Build Kitchen Remodeling in Waltham, Newton, Wellesley & Needham MA" and lead with the service and towns. Add one plain homepage paragraph: what the firm is, where it is, which towns it serves, that it has its own cabinet shop. Add an FAQ with real cost ranges and timelines; cost guides answered 6 of the 8 cost and "who should I hire" queries.

6. **Add structured data** HOURS · WEB

   One HomeAndConstructionBusiness block site-wide via Squarespace code injection: Waltham address, phone, founded 1992, links to the Houzz, Google, Facebook, and Nextdoor profiles, the twelve towns as areaServed. A Service entity per service page; FAQPage markup once the FAQ exists.

Projected visibility after each wave of changes

AREA	TODAY	AFTER WAVE 1: PROFILES AND FIRST REVIEWS	AFTER WAVE 2: FIVE TOWN PAGES, RETITLES, SCHEMA	AFTER WAVE 3: ALL PAGES, FAQ, 25+25 REVIEWS
Waltham (home town)	0 of 4	2–3 of 4	2–3 of 4	2–4 of 4
Newton, Wellesley, Needham, Lexington	0 of 23	1–2 of 23	3–6 of 23	3–7 of 23
Reading, Arlington, Belmont, Concord, Weston	0 of 11	1 of 11	1–2 of 11	2–3 of 11
Boston and MetroWest	0 of 10	0 of 10	0 of 10	1–2 of 10
All service-and-town answers	**0 of 48**	**3–6 of 48** (6–12%)	**5–10 of 48** (11–22%)	**9–16 of 48** (18–34%)

How the projection is built. Each of the 48 answers was tagged with the source the engine used (Houzz list, firm's own town page, Google Business Profile card) and the wave in which Out of the Woods gains that asset: wave 1 reaches 18 answers, wave 2 33, wave 3 46. Having the asset is not being named, so the conversion rate comes from competitors in this audit: firms with reviews but no town pages were named in 21 to 23% of answers, firms with both in 19 to 62% (median 24%). The low end applies half of that, the high end all of it, with a higher band for the home town. Two Boston answers built only from curated lists are treated as unreachable. A day-90 re-run of the 40 queries replaces this projection with a measurement.

Checklist

This week owner: office

- [ ] **Houzz:** location to Waltham, service area set to twelve towns, photos refreshed.
- [ ] **Google Business Profile:** address, phone, categories, hours verified; description names services and towns.
- [ ] **Yelp** owner reply posted; **review asks** sent to the nine testimonial clients with Google and Houzz links. Dave's missing-items list shared.

This month owner: web + office

- [ ] **Directories corrected:** BBB, BuildZoom, MasterBrand, Alignable, MapQuest, Cylex; Arlington Nextdoor claimed and merged.
- [ ] **Four service pages retitled;** "about" paragraph live; structured data injected and validated.
- [ ] **Review asks** to every client from the last three years; 10 Google and 10 Houzz by day 30.

This quarter owner: web + Dave

- [ ] **Town pages live:** Newton, Wellesley, Needham, Lexington, Waltham by day 60; the other five plus MetroWest by day 90.
- [ ] **FAQ page** with cost ranges; cabinetry page rewritten around the shop; awards page; Angi, PRO New England, and NARI profiles completed.
- [ ] **Day-90 re-run** of the same 40 queries; compare to 0 of 48.
